

# Impressive Export options

**Do you use CAD, 3D modelling or Rendering software?**

Take your customers designs to another level! Once you have finalised your design, there are multiple export options that allow you to offer an even greater immersion into the dream that is 'the customers conservatory/extension' (this may be literal if you work with VR). Thus, allowing you to mold their dream into a reality.

These export options include;

- **.STL**
- **.DAE**
- **.DXF**
- **.POV**

See the video below to see some examples of using the export options.

*\*\*The export options are an additional module, please contact us for further details.\*\**
